NEWS RELEASE

Former Hydro One Senior V.P. Ian London Appointed to NLC Board

Woodbridge, Ontario – February 15, 2006. National Challenge Systems Inc., a leader in the provision of vacuum truck services for the collection, treatment and disposal of non-hazardous liquid waste, is pleased to announce the appointment of Mr. Ian M. London to the National Challenge Board of Directors. Mr. London is a proven senior business executive with a strong Canadian and international track record of leading organizations through growth, innovation and change.

Mr. London brings more than twenty years experience in senior positions in the power sector to National Challenge. His vast knowledge of the Ontario and international electricity generation industries will assist the Company with its renewable energy efforts.

“His track record, experience and network contacts will add great value to National Challenge.” said Mr. Charles Buehler, the Company’s CEO.

As previously announced, the Ontario Provincial Government is going to allow small generators of energy to sell electricity into the power grid. This will encourage the development of anaerobic digesters that utilize agricultural and other organic residuals to create biogas and generate a reliable form of renewable energy. As the leading collector of liquid organic waste in Ontario, National Challenge would supply anaerobic digesters with the energy rich high fat, oil and grease (FOG) residuals it collects. National Challenge has the opportunity to play a significant roll in the emergence of this new industry.

Mr. London currently serves as the Chief Executive Officer at Process Products Limited, a distributor and full service provider of fasteners, fittings, and electrical components. Over the past five years he structured and implemented new innovative vendor managed inventory programs for major industrial customers in Canada and the US.

Previously, Mr. London spent twenty-five years working for Hydro One (formerly Ontario Hydro) where, amongst other roles, he served as Senior Vice President, Corporate Business Development; Director of Grid Strategies and Plans, and Director of Engineering & Construction Services. Mr. London also served as President & CEO of Ontario Hydro International.

Mr. London holds an MBA from York University and a Bachelor of Engineering degree from McGill University. Mr. London also attended the Ivey School (University of Western Ontario), where he took the International Management Program.

This press release is available on the Company's official on-line investor relations site for investor commentary, feedback and questions. Investors are asked to visit the investor relations section of the Company’s website at http://www.nationalchallenge.com/NCS_Investor.asp. Alternatively, investors are asked to e-mail all questions and correspondence to Info@NationalChallenge.com where they can also request addition to the National Challenge investor e-mail list to receive all future press releases and updates directly.
